

QR CODES FOR RESEARCHERS

How do you make a link for people to find your work?

WHY?

- Link to your presentation, poster, study, references so that people can follow up
- Easier to scan than to photograph a text link

HOW?

- QR codes are just encoded text
- You can use a program to generate one - there's one linked to the right!
- Canva also generates QR codes - search in apps for "QR code" and add one there!

HOW NOT?

- don't use online services that direct you to their website (eg; has analytics, a timeout, etc)
- These QR codes might stop working, and you can't control it
